工具介绍

Kubekey-v1.1.1

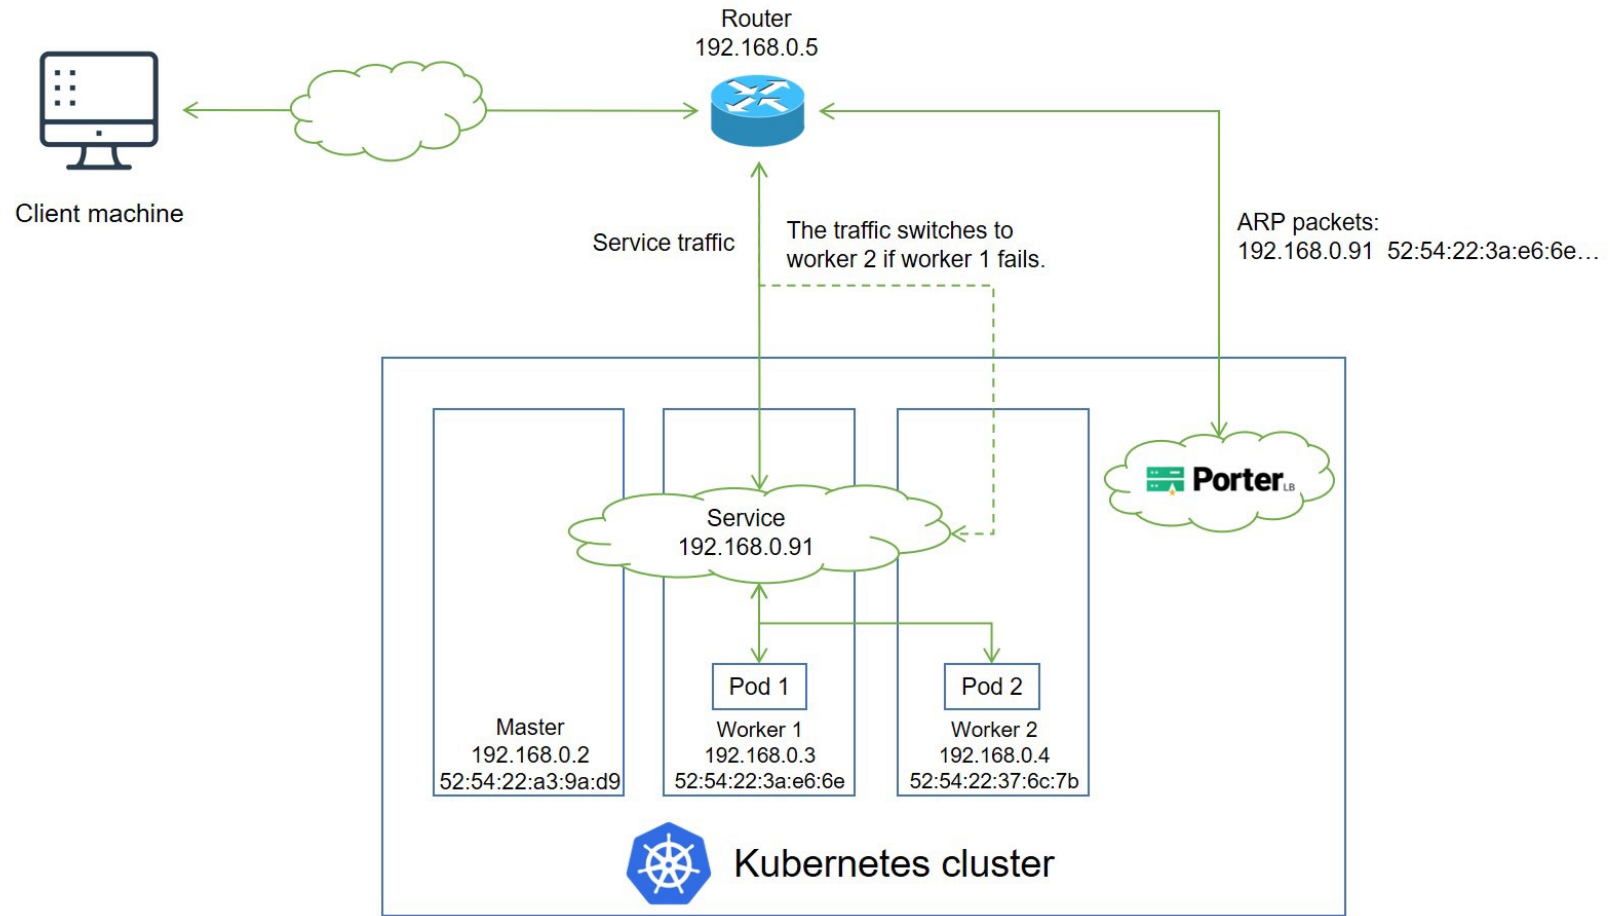

K9s-v0.24.15

 <https://github.com/kubesphere/kubekey/releases>

 <https://github.com/derailed/k9s/releases>

OpenELB

Ngix-Ingress

部署 OpenEBS

安装 Helm3

```
curl https://raw.githubusercontent.com/helm/helm/main/scripts/get-helm-3 | bash  
echo 'PATH=$PATH:/usr/local/bin' >> ~/.bashrc && source ~/.bashrc
```

安装 openEBS

```
helm repo add openebs https://openebs.github.io/charts  
helm repo update  
helm install openebs --namespace openebs openebs/openebs --create-namespace
```

验证 openEBS

```
kubectl apply -f https://openebs.github.io/charts/examples/local-hostpath/local-hostpath-pvc.yaml  
kubectl apply -f https://openebs.github.io/charts/examples/local-hostpath/local-hostpath-pod.yaml
```
